This project is basically a website for my university, Texas A&M University - Corpus Christi. The project was split into 2 applications, mobile and web versions. The website was supposed to give people or students the history and traditions of the university. You could also interact with the website by doing traditions which were given from a list and can redeem prizes once finishing a certain amount of traditions.

In this google folder, I have left a short video on how the website works and the project files.

Thank you!
